

To qualify for the Budget Pay program:

You must have a zero balance on May 31.

You must be placed on a scheduled routed delivery system. We will monitor and fill your tank as needed to avoid the inconvenience and cost associated with a “run-out.”

Your budget payment must be made in full each month.

Discounts available:

\$.05/gallon for simply being enrolled in Budget Pay.

\$.05/gallon for having your payments automatically paid from your Visa or Mastercard.

\$.05/gallon for having your statements e-mailed.

Your monthly payment amount is an estimate of your annual propane needs. Your payment amount will be periodically reviewed to ensure that the amount is sufficient to keep up with usage and the payment amount may be adjusted from time to time. You will receive a monthly statement with your account balance and Budget payment balance. You can also monitor your history and usage via the customer portal on our website.

Keep in mind that the monthly budget plan is only for propane and tank leases. Service work and new purchases are due in 30 days and must be paid in addition to the monthly propane budget payment. The first payment is due in June.

The goal of the Balanced Budget Program is for your account to be at a zero balance in May of every year. Any outstanding balances are due at that time.

If you have automatic withdrawal, you will be responsible for any overdraft fees incurred due to insufficient funds in your account. It is your responsibility to make sure that the transaction goes through every month.
