

DO YOU SUPPORT ENERGY CHOICE?

VAN UNEN MIERSMA
PROPANE

If so...are you aware that you could be losing your right to choose and use propane forklifts?

Agencies in California are pushing to have all propane forklifts converted to electric beginning in 2025, so what does that mean for you?

This means that **ALL** operations currently utilizing propane forklifts may have to convert their equipment to be compliant with the new regulations.

What affect might this have on your organization?

- **High Implementation Costs:** Each new electric forklift can cost up to \$35,000, not including infrastructure.
 - » Can your business afford this unnecessary expense?

BENEFITS OF PROPANE

- RESILIENCY
- RELIABILITY
- AVAILABILITY

- SUSTAINABILITY
- ENVIRONMENTALLY FRIENDLY

DON'T WAIT, TAKE ACTION TODAY!

You can do that by joining us in our unified effort to fight for our and your rights to all forms of alternative, clean energy sources.

Visit protectmypropane.com/forklifts and follow the on-screen instructions, it's that simple!

Willing to share your experiences with the California Air Resources Board (CARB)?

As the process continues, CARB will solicit input from stakeholders during workshops and public comment periods. These are opportunities to share public testimony as to the benefits of propane forklifts. If you are willing, please contact sustainability@vmpropane.com and let's work together.
