

BETTER FOR MOWERS. BETTER FOR COMMUNITIES.

WITH PROPANE MOWERS, you have an opportunity to use taxpayer money more effectively, while saving more for other projects. Municipalities are turning to propane for its proven advantage in several key areas.

REDUCED FUEL COSTS

Operating propane mowers consistently costs less than operating gasoline mowers. When you're able to spend less on greenspace management costs, your department may be able to allocate funds for other community projects. What could you do with the extra savings?

REDUCED LABOR EXPENSES

Propane mowers allow your crews to spend more time doing their work, and less time refueling. Refueling a propane mower is as simple as switching out a tank while on the job — no gas station trips necessary. Crews can cover more ground in the same amount of time, greatly boosting efficiency.

PROTECTION FROM SPILLS AND PILFERAGE

Propane mowers operate on a closed fuel system, so there is virtually no risk of fuel spillage, protecting your parks and greenspaces from damage. The secure fuel system also prevents any fuel pilferage, saving your valuable fuel dollars.

CLEANER OPERATION

Compared with gasoline mowers, propane equipment produces 17 percent fewer greenhouse gas emissions, and 19 percent fewer NOx emissions. Imagine the impact that cleaner operation would have on your community greenspaces. Crews that work with propane also report enjoying the work environment more, increasing overall efficiency.

“WE FOUND PROPANE WOULD GET THE SAME PRODUCTIVITY AND POWER AS CONVENTIONAL FUELS, AS WELL AS A LOW TOTAL COST-OF-OWNERSHIP, WHICH WOULD PLEASE THE SCHOOL’S ADMINISTRATION AND THE STATE’S TAXPAYERS.”
